To whom it may concern,

In these difficult times for the travel industry, Aircraftstyle Ltd. believes that commercial aircraft as flying billboards for advertising is a highly effective medium.

Airlines are struggling they need any new revenue they can find, brands of all kinds need to be visible, especially hotels, resorts, restaurant chains car rental companies, luxury goods to automobiles.

Airline travellers are going to be purchasing many of the above goods and services, why not target them while they are on their journeys? With a aircraft billboard.

An aircraft painted like a bill board will be seen at many airports, always working the high visibility at an airport taxing around or taking off and landing builds awareness and reminder to consumers waiting for flights, as well as targeting a variety of customers.

We would like to explore this medium with you, we believe it is a win-win situation for the airline, the brand, the advertising agency and us.

The costs of designing and painting an aircraft are very reasonable roughly € 120k - 150k for a narrow-body B737/A320 up to € 200k - 300k for a long haul wide body airliner.

The airline will be happy to provide you with an airplane as a canvas as long as its brand is recognized and for a monthly fee stars at \$12,000.

If this sounds interesting please contact us to discuss, it is a novel marketing whose time is now when the tourist industry is in trouble ad many aircraft are parked and hotels, restaurants, resorts are closed or barely half full.

We manufacture your art-livery painting, from planning to execution. From the feasibility study to execution of a agencies design templates, we are able to paint everything in every style on every aircraft type.

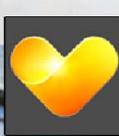

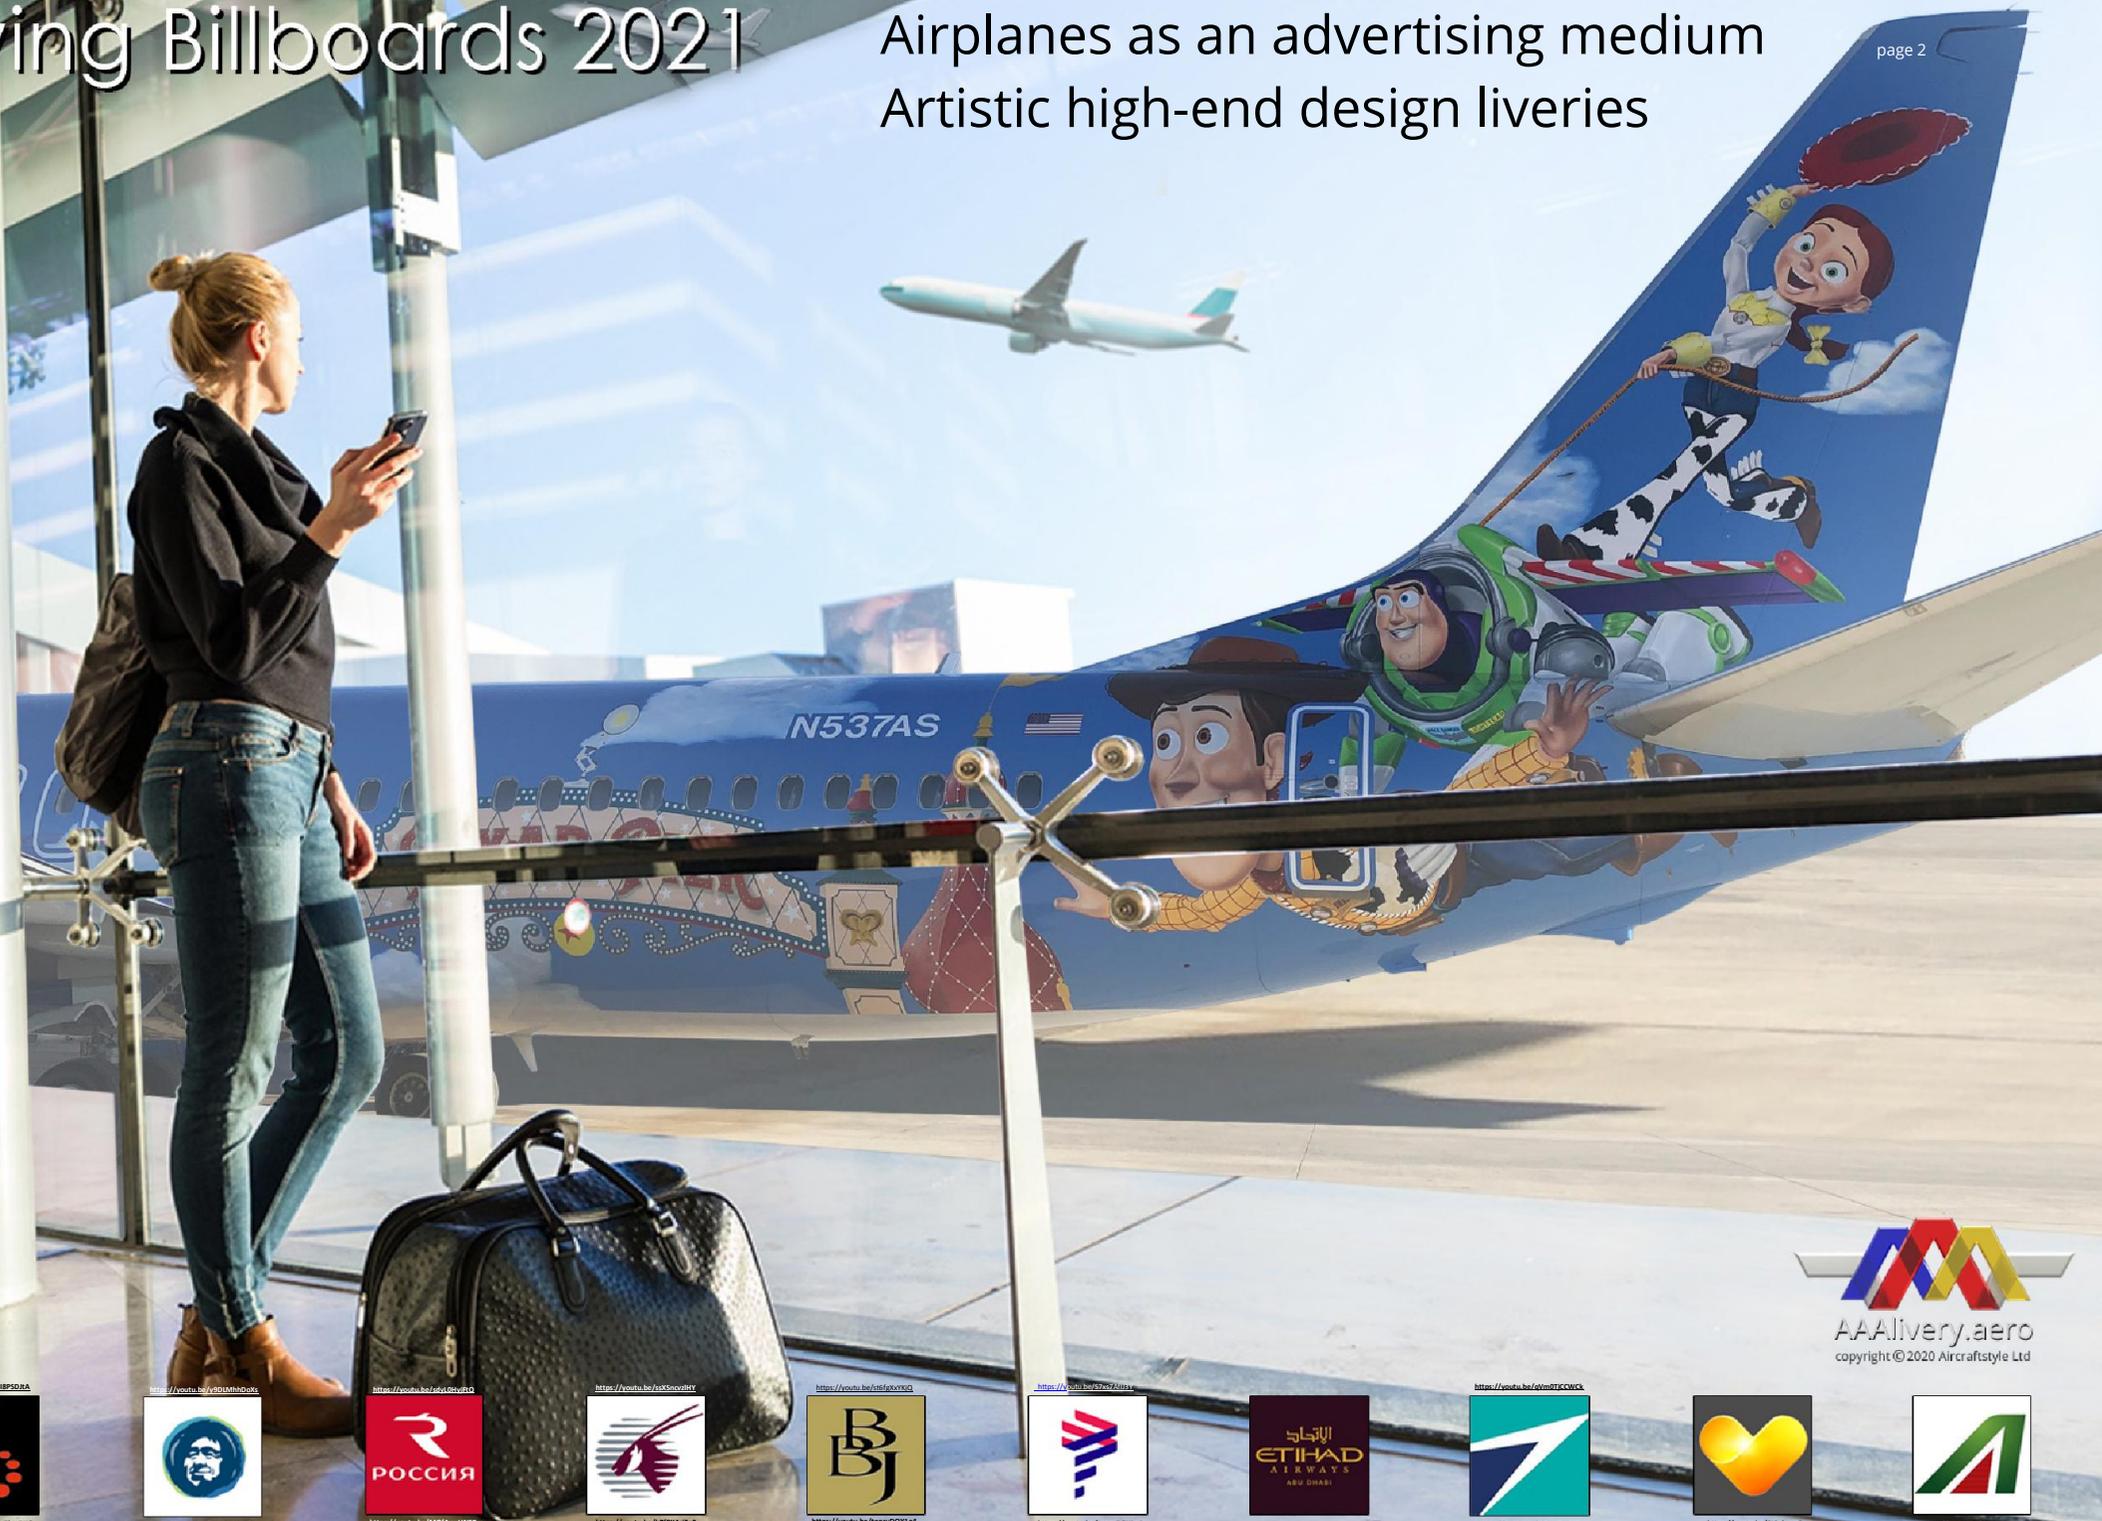

We provide 100% customer satisfaction!

Cheers André Eisele

Visions made come true - design without limits

Flying Billboards 2021

Airplanes as an advertising medium
Artistic high-end design liveries

Airplanes as advertising media, as an ambassador for a country (tourism), company branding or to announce a major event, are elegant, effective and economically very interesting!

Aircrafts, the most exclusive advertising medium ever!

To bring industrial global players and airlines closer together, that's our target.

Definitely good business for both sides, a win-win situation!

Who we are

Eisele – the artist's family – for generations in art.

For over than 45 years I have created artwork - no task is too difficult for me and my team.

We make art possible with our unique airbrush technique on every airplane. The aviation community around the world knows me for high-quality art liveries and that we are demonstrably able to create outstanding artworks of art in any frame!

Our customers such as Qatar Airways, Brussels Airlines, Westjet, BBJ customers, Thomas Cook, Alitalia, Etihad, Rossiya Airlines, Latam and the Red Bull Racing team go one step further in terms of high-quality aircraft design - our clients trust that we can realize their vision with the fastest possible processing time.

With your chosen favorite paint system, we can carry out our art part with the highest precision.

We use the highest quality paint manufacturers such as AkzoNobel, PPG and Mankiewicz or whichever aircraft paint manufacturer is used, our finished painted aircrafts are always completed to an extremely high standard and our clients are always very happy with the end results.

What we do

We're changing standards of aircraft art painting from 3D design drafts up to XXL format airbrush painting.

We define your brand by creating your design with a 3D-feasibility study and after that, we paint your aircraft with the finest airbrush technique.

This procedure allows you an accurate preview of the project's planned design.
